INTRODUCTION

1915

This is the second edition of a collection of portraits of men prominent in business and professional life in the state of Minnesota. The other volume was published in 1902.

A comparison of the two works shows a great change in the prominent men of the state. Many of those whose portraits appeared in the work thirteen years ago, have long since passed away. On many pages every one of them have disappeared. On others, half of them have gone.

Similar works are published pretty generally throughout the Union and the first issue of this state gave such eminent satisfaction that the second issue was undertaken with considerable confidence and has met with even more success than the first and it is quite evident that the efforts of the publishers are appreciated.

The primary design of the work is to present a portrait album of the leaders in the various walks of life and their contemporaries, business associates and friends, as a work of reference for the present generation and as a valuable historical contribution to future generations who will greatly appreciate this effort on the part of the publishers to preserve the features and forms of men upon whom the destiny of the state depends.

This work contains 2048 engravings of men prominent in their various circles of life, including merchants, manufacturers, financiers, physicians, attorneys, clergymen, publishers, government, state, county and city officials, and heads of departments of the various institutions and organizations through the state.

A large number of the photographs contained herein have been made especially for this work, and there will be found in it portraits of more than 1000 men who have been photographed for the first time in many years, especially for this publication.

It is a Herculean task to gather and engrave and print the protraits of 2000 men of the character of those who are included in this work. It is impossible to include everyone of prominence and yet, in looking over the groups, it will be found that very few men who have attained prominence in any business or profession, have been omitted.

The work has been made upon honor, regardless of labor and expense. The assistance of leaders in the various lines have materially aided in the selection of the names and in the groupings of the engravings.

The titles are brief and are condensed to a few lines. Often it would be easier to write a page of ordinary biography than to indicate a man's career in two lines.

The uses to which this volume will be submitted are unlimited. It will be of constant reference value in libraries, newspaper offices, banks, mercantile houses and in the homes of the best people through the state.

The immense amount of time and labor that has been expended in the production of this volume, the energy, perserverance, courage and financial ability of the publishers are indicated in the fact that a large force of men have been engaged for more than two years in the selection of the names, the collection of the portraits and the compilation of the matter at an immense outlay of money and labor. All labor and material of which the work has been produced are the best the market affords. The engravings are the perfection of the engraver's art. The leather with which the book is bound is the highest grade of Turkish Morocco ever imported in this country. The embossing and gilded edges are Pure Virgin Gold Leaf.

The work is a model of typographical beauty and of mental and mechanical ingenuity and perfection. Its historical value will be appreciated by all future generations.

In speaking of a similar work published for the state of New York, Hon. Joseph Choate, United States Ambassador to Great Britain has said, "It is a most valuable volume, for between its handsome covers in compact space, are the faces of more than 1000 of my personal acquaintences including a large number of friends and intimate associates, all classified and indexed in a desirable album which could not otherwise be obtained at many times its price."

Similar expressions from leading men of other states are found in the introductions of works of this nature in other localities.

Mr. Warren P. Upham, as secretary of the Minnesota Historical Society, wrote, "I most heartily commend your plan to publish a book entitled **'Men of Minnesota.'** It will be of great value to this society for reference by our present readers and will be more valuable in years to come."
